

WESTERN COALFIELDS LIMITED
OFFICE OF THE SUB AREA MANAGER
SASTI SUB AREA, BALLARPUR AREA

Ref No. WCL/BA/AGM/ENV/1440

Date: 14/05/2025

To
Addl. Principal Chief Conservator of Forests,
Ministry of Environment, Forest & Climate Change
Integrated Regional Office, Ground Floor, East
Wing, "New Secretariat Building", Coal Lines,
Nagpur, Maharashtra- 440001

Sub: - Submission of Six monthly EC Compliance Report in respect of **SASTI OC MINE**, Ballarpur Area, WCL for the period from 1st October 2024 to 31st March 2025.

Respected Sir,

Please find enclosed herewith the Six Monthly EC Compliance Report in respect of Sasti Opencast Project, Ballarpur Area for the period from 1st October 2024 to 31st March 2025.

EC NO: J-11015/435/2006-IA.II(M) Dated:- 17.05.2007

EC NO: J-11015/435/2006-IA.II(M) Dated:- 13.09.2023

Thanking you.

Encl. Environment Compliance Report

Yours Faithfully

Sub Area Manager
(Sasti Sub Area)

Copy To,

1. Regional Officer, MPCB Chandrapur.
2. AGM, Ballarpur Area, WCL
3. The General Manager (Env) WCL, Nagpur
4. GM (Environment), CMPDIL RI - IV, Nagpur
5. Area Nodal Officer (Env), Wani Area.
6. Office Copy

WESTERN COALFIELDS LIMITED

SIX MONTHLY

EC COMPLIANCE REPORT

FOR PERIOD OF

1st October 2024 to 31st March 2025

SASTI EXPANSION OC MINE

BALLARPUR AREA, WCL

SASTIEXPANSIONOPENCASTCOALMINE
MOEFCLEARANCELETTERNo.J-11015/435/2006.IA,II(M)DATED17.05.2007FORSASTIEXPANSION
OCM FOR A PRODUCTION OF 2.50 MTY.

SN	ENVIRONMENTAL CLEARANCE CONDITIONS	COMPLIANCE
A	Specific Conditions	
(i)	Mining shall be carried out as per statuette at safe distance from the Gouri nallah/Wardha River flowing close To the lease boundary.	Mining activities are restricted within lease hold boundary at a distance of 1.85 km from Gouri Nallah & 2.50 km from Wardha River .
(ii)	The embankment to be constructed along the seasonal nallah shall be of suitable dimensions and stablised with plantation so as to withstand the peak water flow and prevent mine inundation.	Suitable embankment of proper dimension has been constructed to protect the area/ Mine from floodwater as per DGMS norms. Dimensions of embankment is given as below. Length- 3570mtr. Top width & RL-20mtr.,181.5 to 218.5 Bottom width & RL -56to124mtr.,172.5to 180.00 Height-9.00 mtr to 38.00 mtr. Erstwhile embankment as mentioned above has been realigned since a portion of embankment of about 1000 m has come under excavation area.
(iii)	Topsoil shall be stacked properly with proper slope at earmarked site (s) and should not e kept active and shall be used for reclamation and development of green belt.	Top soil is stacked properly with proper slope at earmarked site Details of dumps are as follows: Dump no:5 Height = 34m Area=21.251Ha Slope=28degrees Part of the above dump is reclaimed with plantation Dump no: 1 Height = 22 m Area=15.754Ha Slope=28degrees It is an active dump created in 2018-19.

(iv)	OB should be stacked at the earmarked five external OB dumpsite within ML area which shall be a maximum height of 60m only and consist of four benches of 15m each. The ultimate slope of the dump shall not exceed 28degree, Monitoring and management of Reclaimed dump site should continue	All 5 external O.B. Dumps were stacked at earmarked Dump sites only and 4 out of 5 dumps are afforested. The overall slope of the Dumps is 28 degree. However the afforestation has become so dense that side slope is not at all visible. The plantation has attained the height of approx 9to 10mtrs and the vegetation has become self sustaining.
	until the vegetation becomes self-sustaining. Compliance status should be submitted to the Ministry of Environment & Forest and its Regional office located at Bhopal on an yearly basis.	
(v)	Catch drain sand siltation ponds of appropriate size should be constructed to arrest silt and sediment flows from soil, OB and mineral dumps. The water so collected should be utilized for watering the mine area, roads, greenbelt development etc. The drains should be regularly desilted and maintained properly. Garland drains(size gradient and length) and sump capacity should be designedkeeping50%safetymargin over and above the peak sudden rainfall and maximum discharge in the area adjoining the mine site. Sump capacity should also provided adequate retention period to allow proper settling of silt material.	Settling / sedimentation pond of appropriate size has been constructed to treat the industrial (Mine activity area) effluent including water pumped out from mine considering peak discharge. The water so treated is being used within the mine premises for dust suppression, watering of HEMM & FOR PLANTATION, Industrial use, fire fighting.. Garland drains of appropriate different sizes of 3.00x2.00, 2.00x1.5, & 1.5.x1.00mtr. for a total length of 12235.00mtr.have been provided along the periphery of excavated area as well as OBD. Desilting is being done every year before on set of monsoon.
(vi)	Dimension of the retaining wall at the toe of the dumps and OB benches within the mine to check run-off and siltation should be based on the rainfall data.	The Dumps are also thickly planted on top as well as on slope. The afforestation have become so dense and self sustaining that the side slope is not at all visible. The plants have attained the height of approx, 9 to 10mtrs.Inthepresentoperatingportionof mine specially benches, such retaining wall is not required. Moreover cross drainage in OB benches have been provided which carry all the silts & sediments ultimately to mine sump provided at the floor of seam. The sump capacity is sufficient enough to allow settlement of suspended matter significantly and only Supernatant water is pumped out on surface.
(vii)	Drills should be wet operated only.	Drills are fitted with wet drilling arrangement.

(viii)	Controlled blasting should be practiced with use of delay detonators. The mitigative measures for control of ground vibrations and to arrest the fly Rocks and boulders should be implemented.	Controlled blasting is being done as per scientific investigations for design of controlled blasting pattern with SME explosives at Sasti Expansion Opencast mine done by CSIR-Central Institute Of Mining and Fuel Research. Copy of Study Attached as ANNEXURE I .
(ix)	High efficiency bag filters / water sprinkling system to check fugitive emissions from crushing operations, conveyor system, haulage roads, transfer points, etc. shall be installed and operated effectively at all times of operation.	Adequate Fixed type water sprinklers are provided in & around C.H.P. Weigh Bridges, coal transport roads, transfer points etc. as per direction of M.P.C.B., Chandrapur. They are being properly maintained & operated. Details of Air pollution Control measures are given as below :- 1. Fixed sprinklers are provided at 100 MT weighbridge- 08 Nos. 2. Fixed sprinklers are provided at Main CHP - 06 Nos. 3. Along Coal transportation road- 04 nos 4. Concrete pavement provided at coal unloading Area and loading point at mini CHP. 5. Brooming and maintenance of coal transport road and weigh bridge road is done regularly. 6. Spraying of water by 5 Nos. of Mobile Water Tankers (Hired-1 nos. Of 4 KL, Departmental – 2 nos. of 28 KL each and HOE contractor – 2 nos. Of 28 KL each) 7. Concrete pavement is provided in w/s complex. 8. Coal carrying Trucks are covered with Tarpaulin. 9. Tarring of 06.00 km length of internal roads used by Coal Transportation trucks. 10. One no. of trolley mounted fogger has been commissioned at Sasti OC mine with a throw of 100m. 11. Further 3 nos. are to be commissioned in July 2025. 12. Tyre wash system has been installed.

(x)	An area not less than 451.65 ha shall be brought under afforestation which Includes reclaimed external OB dump (235.30ha),backfilled area(166.35ha), Along ML boundary, along roads & Infrastructure ,greenbelt (50ha) and area in township located outside the Lease by planting native species in consultation with the local DFO/ Agriculture Department. The density of The trees should be around 2500 plants Per ha.	Noted and will be complied. Total Plantation of 5.15 lakhs done in Sasti OCM in 179.15Ha.				
		Sr no.	Year	Plantatio n (nos.)	Area(Ha)	Species
		1	1993-94	47425	9.48	Neem, Gulmohar Amla, Soniya, Maruk, Khair, Kadamba, Bamboo, Ber,etc.
		2	1994-95	60000	12.0	
		3	1995-96	40000	8.0

		15	2002-03	22250	8.90	
		16	2007-08	25000	10.0	
		17	2009-10	2000	0.80	
		18	2013-14	12500	5.00	
		19	2024-25	25000	10.0	
	TOTAL	540000	179.15			
(xi)	A Progressive Mine Closure Plan shall be implemented by reclamation of Quarry area of which 166.35 Ha shall be Backfilled and afforested by planting Native plant species in consultation with the local DFO / Agriculture Department. The density of the trees Should be around 2500 plants per ha. The balance 63 ha of decoaled void Which is being converted into a water Reservoir, shall be gently sloped along the upper benches, terraced and	It is being done. Total Plantation of 5.15 lakhs Done in Sasti OCM in 179.15 Ha.				
		Sr no.	Year	Plantatio n (nos.)	Area(Ha)	Species

		18	2013-14	12500	5.00				
		19	2024-25	25000	10.0				
			TOTAL	540000	179.15				
		(xii)	The company shall obtain prior approval of CGWA/CGWB Regional Officer for use of ground water if any, for mining operations.	CGWA NOC obtained vide CGWA/NOC/MIN/ORIG/2021/12462 valid upto 02/08/2025. Attached as Annexure II .					
		(xiii)	Besides carrying out regular periodic health check up of their workers, 10% of the workers identified from workforce engaged in active mining operations shall be subjected to health check up for occupational diseases and hearing impairment, if any, through an agency such as NIOH, Ahmedabad within a period of two years and the results reported to this Ministry and to DGMS.	Periodical medical Examinations (P.M.E.) are carried out on compulsorily on each employee once in five years with the purpose of detecting and keeping records of diseases with specific importance to Coal Worker’s Pneumoconiosis. This is covered under Statute. During P.M.E., the candidates are subjected to a complete clinical examination, (including acuity of vision and hearing), radiological examination of chest and routine examination of blood and urine. In case some abnormality is detected during the course of the above examination, further investigations are carried out , as required. When a person is diagnosed as having a certain disease, he is referred to the concerned specialist for confirmation and initiation of treatment.					

(xiv)	A Final mine Closure Plan along with details of Corpus Fund should be submitted immediately upon receipt of EC to the Ministry of Environment & Forests RO, Bhopal for approval.	Mine closure guidelines came into force from 27/08/2009, wherein detailed framework for Mine Closure Plan was described. Thereafter MCP for Sasti OC was prepared. As per amended guidelines the competent authority to approve MCP of mines of Govt. Companies will be concerned board of Company. Following the directives of MoC, MCP of Sasti OC was prepared and the same was approved by WCL Board on 25/08/2012. MCP was further revised after EC for Expansion was obtained for increase in ML area.
(xv)	For monitoring land use pattern and for post mining land use, a time series of land use maps, based on satellite imagery (on a scale of 1:1500) of the core zone and buffer zone from the start of the project until end of mine life shall be prepared once in 3 years (for any one particular season which is consistent in the time series) and the Report submitted to MOEF and its Regional Officer at Bhopal.	Complied. Attached as ANNEXURE III .
(xvi)	Consent to operate shall be obtained before expanding mining operations in the additional lease area and for the enhanced rated capacity after fulfilling the conditions imposed in the NOC.	CTO has been obtained for capacity 2.50 MTPA valid upto 31.03.2025. Further application for validity upto 31.03.2028 has been applied. Copy attached as Annexure IV.
B	General Conditions	
(i)	No change in mining technology and scope of working should be made Without prior approval of the Ministry Of Environment and Forests.	Noted. No change has been made.
(ii)	No change in the calendar plan including excavation, quantum of mineral coal and waste should be made.	Noted.

(iii)	Four ambient air quality monitoring stations should be established in the core zone as well as in the buffer zone for SPM, RPM, SO₂ and NO_x monitoring. Location of the stations should be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive targets in consultation with the State Pollution Control Board.	Four ambient air quality monitoring stations are established as below :- 1. BSOA-1-FilterplantatGouricolony. 2. BSOA-2-Sastivillage. 3. BSOA-3-SAMOffice. 4. BSOA-4-AreaStore. Monitoring of SPM, RPM, SO₂ and NO_x is being done fortnightly. Monitoring reports for the month of October 2024 and March 2025 attached as Annexure V.
(iv)	Fugitive dust emissions (SPM and RPM) from all the sources should be controlled regularly monitored and data recorded properly. Water spraying arrangement on haul roads, wagon loading, dump trucks (loading and unloading) points should be provided and properly maintained.	Adequate Fixed type water sprinklers are provided in & around C.H.P. Weigh Bridges, coal transport roads, transfer points etc. as per direction of M.P.C.B., Chandrapur. They are being properly maintained & operated. Details of Air pollution Control measures are given as below :- 1. Fixed sprinklers are provided at 100 MT weighbridge- 08 Nos. 2. Fixed sprinklers are provided at Main CHP - 06 Nos. 3. Along Coal transportation road- 04 nos 4. Concrete pavement provided at coal unloading Area and loading point at mini CHP. 5. Brooming and maintenance of coal transport road and weigh bridge road is done regularly. 6. Spraying of water by 5 Nos. of Mobile Water Tankers (Hired-1 nos. Of 4 KL, Departmental – 2 nos. of 28 KL each and HOE contractor – 2 nos. Of 28 KL each) 7. Concrete pavement is provided in w/s complex. 8. Coal carrying Trucks are covered with Tarpaulin. 9. Tarring of 06.00 km length of internal roads used by Coal Transportation trucks. 10. One no. of trolley mounted fogger has been commissioned at Sasti OC mine with a throw of 100m. 11. Further 3 nos. are to be commissioned in July 2025. Tyre wash system has been installed.

(v)	Data on ambient air quality (SPM,RPM,SO ₂ and NO _x) should be regularly submitted to the ministry including its Regional office at Bhopal and to the State Pollution Control Board and the Central Pollution Control board Once in six months.	Ambient Air quality monitoring is being carried out as per GSR 742(E). The monitoring reports on quarterly basis are submitted to MOFF, and MPCB Chandrapur as per directives. Monitoring reports enclosed as Annexure V .
(vi)	Adequate measures should be taken for control of noise levels below 85dBA in the work environment. Workers engaged in blasting and drilling operations, of HEMM etc. should be provided with ear plugs / muffs.	Regular monitoring through CMPDIL is being done on fortnightly basis and the results are within limits, Workers exposed to high noise level are provided with ear plugs/muffs. HEMM are properly maintained and kept in good condition. Noise proof cabins of HEMM are also provided. Sound level meter is used for Measuring noise levels at work place and records are maintained.
(vii)	Industrial waste water (workshop and waste water from the mine) should be properly collected, treated so as to conform to the standards prescribed under GSR 422 (E) dated 19 th May 1993 and 31 st December 1993 or as amended from time to time before discharge. Oil and grease trap should be installed before discharge of workshop effluents.	Sedimentation/Settling tank is provided in the mine. Mine water is pumped out after proper treatment. The results of mine water are within permissible limit. ETP along with oilskimmer is provided at workshop along with recycling system ETP sludge is properly stacked in the sludge yard as per the directives of MPCB. ETP-150KL/day. The effluent discharge are monitored as per GSR 742(E). Monitoring reports enclosed as Annexure V .
(viii))	Vehicular emissions should be kept Under control and regularly monitored. Vehicles used used for transport-ing the	Vehicular emissions are being monitored Regularly and it is kept under control. Trucks used for transporting of coal are being covered with

	mineral should be covered with tarpaulins and optimally loaded.	tarpaulins.
(iv)	Environmental laboratory should be established with adequate number and type of pollution monitoring and analysis equipment in consultation With the State Pollution Control Board.	CMPDI Laboratory exists at Nagpur, which monitors all the mines of WCL.
(x)	Personnel working in dusty areas should wear protective respiratory devices and they should also be provided with adequate training and information on safety and health aspects. Occupational health surveillance programme of the workers should be undertaken periodically to observe any contractions due to exposure to dust and to take corrective measures, if needed.	Protective respiratory devices are provided to workmen exposed to dust area. Workers are also regularly given training on safety and health aspects at VTC. (This is the statutory requirements under Mines Safety Act). Periodical Medical Examination of every worker is being done in every five years in our Area Hospital to detect any disease so that appropriate action can be taken up. PME of every person employed in mine is done in interval of five years at area hospital. PPE kit is being distributed on regular basis. PPE includeJackets,Helmets,Earplugs,masks,Gumboots, Safety Shoes, Googles, water bottle etc.

(xi)	A separate environmental management cell with suitable qualified personnel should be set up under the control of a Senior Executive, who will report directly to the Head of the company.	At HQ, WCL- The cell is headed by GM (Env) reporting to Director (Technical). The team comprises of multi-disciplinary trained executive. At Area level –Area General Manager heads the Environment Department assisted by GM (opr), ANO(Env), & 1 Assistant Managers of Environment discipline. At Unit Level- Environment Management Cell is headed by Sub-Area Manager and assisted by Mine Manager, Project Nodal Officer (Env) at Unit level.
(xii)	The funds earmarked for environmental protection measures should be kept in separate account and should not be diverted for other purpose. Year-wise expenditure should be reported to this Ministry and its Regional Office at Bhopal.	The funds earmarked for Environmental protection measures are kept in separate account and it is not used for any other purpose.
(xiii)	The Regional Office of this Ministry located at Bhopal shall monitor Compliance of the stipulated conditions. The Project authorities shall extend full Cooperation to the office(s) of the Regional office by furnishing the Requisite data/information/monitoring reports.	Noted.
(xiv)	A copy of E.C. will be marked to concerned panchayat / local VGP, if any, from who many suggestion/ representation has been received while processing the proposal.	Clearance letter has been sent to concerned Gram Panchayat vide letter No. WCL/BA/SSA/910 dated : 26.06.2007.
(xv)	State Pollution Control Board should display a copy of the clearance letter at the Regional Office, District Industry Centre and Collector's Office / Tehsildar's Office for 30 days.	Noted.
(xvi)	The Project authorities should advertise at least in two local newspapers widely circulated around the project, one of which shall be in the vernacular language of the locality concerned	Complied. Attached as ANNEXURE VI.

	Within seven days of the clearance letter informing that the project has been accorded environmental clearance and a copy of the clearance letter is available with the State Pollution control Board and may also be seen at the website of the ministry of Environment & Forests at http://envfor.nic.in.	
3	The Ministry or any other competent Authority may stipulate any further Condition for environment protection.	Agreed.
4	Failure to comply with any of the conditions mentioned above may result in withdrawal of this clearance and attract the provisions of Environment (Protection) Act, 1986.	Agreed.
5	The above conditions will be forced inter-alia, under the provisions of the Water (prevention & control of pollution) Act 1974, the Air (prevention & control of pollution) Act, 1981, the Environment (Protection) Act, 1986 and The Public Liability Insurance Act, 1991 along with their amendments and rules.	Agreed.

**ECCOMPLIANCEREPORTFORSASTI
EXPANSION OC MINE**

FileNo.:J-11015/435/2006-IA.II(M)

DATED:13.09.2023

Srno.	CONDITIONS	COMPLIANCESTATUS
	ADDITIONALSPECIFICCONDITIONS	
1	PP shall conduct comprehensive hydraulic and drainage study of catchment area to assess the impact on the wardha river within a year and submit the report to IRO.	Copy of report attached.
2	PP shall submit the proof of submission of Wildlife Conservation Plan for schedule I species to IRO and further deposit the allocated amount within six months.	Wildlife Conservation Plan for schedule I species have been submitted to DCF office for approval along with fund allocation.
3	PP shall carry out the mining activity at a safe distance of 100m from Gauri Nallah/ Wardha River flowing through mine lease area or adjacent to the lease area. In any circumstances, PP shall not divert any streams flowing within/adjacent to the mine lease area till no comprehensive study as stated above is done.	Mining activity is being carried out at a safedistance of 100m from Gauri Nallah/ Wardha River flowing through mine lease area or adjacent to the lease area. Diversion shall only be done after obtaining prior designs and approvals from state/central organisations.
4	PP needs to extract the seepage ground water from the mine and treat it through ETP so that the water can be further utilize in the Mine as well for the local villagers.	Mine discharge is being treated through sedimentationtank before discharging into local nallah. Treated water is also being used for dust suppression in the mine.
5	PP shall implement dedicated in pit conveyor belt with silo loading system till railway siding on or beforeDecember,2025. Accordingly, SPCB may grant CTO to strictly comply this conditions	Tender has been floated for construction of SILO system in Sasti OC. It is expected to completed by June 2027. Amendment will be sought for extension of timeline in this condition.
6	The truck size of 40 tonne (payload) for the transportation of coal shall be deployed through dedicated road till commissioning of SILO with rapid loading system on or before December, 2025 accordingly SPCB may issue the CTO.	Truck size of 40 tonnes are being used for transportation of Coal.
7	PP has to resolve suggestions/objections raised during the public hearing along with implement activities-wise proposed budget of Rs.113.33 Lakhs (as Public Hearing Budget), Rs.1250Lakhs (as EMP cost)in time bound manner as pers. no.(xvi)&(xvii) of para 47.1.3 of MoM of the EAC meeting. The details of annual expenditure shall be part of report submitted to IRO, MoEF&CC. PP needs to include the audited figures against the expenditure and activities to be monitored by through dedicated online monitoring mechanism. The maintenance of all	Agreed. Will be complied.

	Activities shall be covered through recurring cost of Public Hearing, which will be part of CSR budget.	
8	PP has to implement capital budget upto Rs. 1341.37 lakh for implementing additional air pollution control measures, Rs.125lakhs for mitigation of water pollution in time bound manner as per s.no. (xiii)&(xix) of para 47.1.3 of MoM. It shall be monitored by IRO, MoEF&CC.	Agreed and will be complied.
9	Install dust barrier (made up of natural fibre) with automatic fixed type sprinkling system across the village area/sensitive area.	Complied.
10	PP shall increase number of fixed type sprinkling system (near to haul road, stockyard, transportation route etc.) across the mine lease area in order to arrest the dust coming out from the mining activities.	Adequate Fixed type water sprinklers are provided in &around C.H.P. WeighBridges, coal transport roads, transfer points etc. as per direction of M.P.C.B., Chandrapur. They are being properly maintained & operated. Details of Air pollution Control measures are given as below :- Fixed sprinklers are provided at 100 MT weighbridge- 08 Nos. 1. Fixed sprinklers are provided at Main CHP - 06 Nos. 2. Along Coal transportation road-04nos 3. Concrete pavement provided at coal unloading Area and loading point at mini CHP. 4. Brooming and maintenance of coal transport road and weigh bridge road is done regularly. 5. Spraying of water by 5 Nos. of Mobile Water Tankers (Hired-1 nos. Of 4 KL, Departmental – 2nos. of 28 KL each and HOE contractor – 2 nos. Of 28 KL each) 6. Concrete pavement is provided in w/s complex. 7. Coal carrying Trucks are covered with Tarpaulin. 8. Tarring of 06.00 km length of internal roads used by Coal Transportation trucks. 9. One no. of trolley mounted fogger has been commissioned at Sasti OC mine with a throw of 100m. 10. Further 3 nos. are to commissioned in July 2025. 11. Tyre wash system has been installed.

11	Implement the integrated transportation system with Dhuptala OC mine locating near to the existing mine owned by M/s Western Coalfields limited.	Complete coal from Dhuptala OC is being transported through tarpaulin covered trucks to Railway siding after passing through Tyre wash system. Complete 4.0 km of transportation road is black topped. More over truck mounted sweeping machine is deployed on he said transportation route. There are no plans of integration of transportation system with Dhuptala OC mine.																																																																																							
12	PP shall install additional Continuous air quality system at different locations near to village area and share online data w ith SPCB as well as with CPCB.	CAAQMS has been installed at SastiOC and the data has been linked with SCPCB and CPCB servers																																																																																							
13	Afforestation activity shall cover area not less than 600 ha, including reclaimed external OB dump, backfilled area, along ML boundary, along roads & infrastructure, township area. The density of the trees should be around 2500 plants per ha.	It is being done. Total Plantation of 5.15 lakhs done in Sasti OCM in 179.15 Ha. <table><tr><th>Sr no .</th><th>Year</th><th>Plantatio n (nos.)</th><th>Area (Ha)</th><th>Species</th></tr><tr><td>1</td><td>1993-94</td><td>47425</td><td>9.48</td><td rowspan="19">Neem, Sissoo, Gulmohar, Mango,Amla, Jamun,Soniya, Bija, Maruk, Kavath,Khair, Karanj, Kadamba, Siras,Bamboo, Arjun,Ber,etc.</td></tr><tr><td>2</td><td>1994-95</td><td>60000</td><td>12.0</td></tr><tr><td>3</td><td>1995-96</td><td>40000</td><td>8.0</td></tr><tr><td>4</td><td>1995-96</td><td>25000</td><td>5.0</td></tr><tr><td>5</td><td>1996-97</td><td>35000</td><td>14</td></tr><tr><td>6</td><td>1997-98</td><td>22000</td><td>8.0</td></tr><tr><td>7</td><td>1997-98</td><td>37000</td><td>14.4</td></tr><tr><td>8</td><td>1997-98</td><td>2000</td><td>0.4</td></tr><tr><td>9</td><td>1998-99</td><td>66575</td><td>26.17</td></tr><tr><td>10</td><td>1998-99</td><td>34000</td><td>13.50</td></tr><tr><td>11</td><td>1998-99</td><td>2000</td><td>0.70</td></tr><tr><td>12</td><td>1999-00</td><td>34000</td><td>13.30</td></tr><tr><td>13</td><td>2000-01</td><td>30000</td><td>12.0</td></tr><tr><td>14</td><td>2002-03</td><td>18750</td><td>7.50</td></tr><tr><td>15</td><td>2002-03</td><td>22250</td><td>8.90</td></tr><tr><td>16</td><td>2007-08</td><td>25000</td><td>10.0</td></tr><tr><td>17</td><td>2009-10</td><td>2000</td><td>0.80</td></tr><tr><td>18</td><td>2013-14</td><td>12500</td><td>5.00</td></tr><tr><td>19</td><td>2024-25</td><td>25000</td><td>10.00</td></tr><tr><td></td><td>Total</td><td>540000</td><td>179.15</td><td></td></tr></table>	Sr no . 14	PP shall conduct special drive for villages such as Sasti, Gauri, Pauni and other nearby villages for air pollution mitigation measures and no coal storage yard, OB dump shall be dumped near to the villages.	Agreed and will be complied in FY 2025-26
15	Water storage ponds shall be constructed of appropriate depth in nearby village in collaboration with Gram Panchayat	Water storage ponds have been constructed at 3 villages namely Mathra, Charli and Dhuptala. Dimension of tank are 40m * 30m.
16	PP shall increase the bed capacity of the existing Hospital from 25 to 50 bedded at Sasti Township and allow local villager to avail the hospital facility. Quarterly health check-up campaign shall be conducted in all the villages located in 10km buffer area.	Health checkup campaigns are regularly carried out in villages of Buffer zone. Also, process of obtaining necessary permission and approvals for conversion of existing Hospital from 25 to 50 bedded at Sasti Township is underway.
17	PP shall construct 25-sitter digital library in each village including the daily newspaper facility.	Digital library has been installed at Dhuptala village.
18	PP shall create a “Public Grievance Redressal and Monitoring System” for resolving any issues related to the pollution of mines and complaint has to resolve as soon as possible not beyond 30 days. In this regard, adequate awareness to be spread among the public to address their grievance to company with simple and easy manner and for which company needs to devise the mechanism. The same shall be reported to IRO within 3months. A logbook to be maintained by PP on “Public Grievance Redressal and Monitoring System.”	Public Grievance Redressal and Monitoring System” for resolving any issues related to the pollution of mines and complaint has been setup. At Area level Logbook for the same will be maintained
19	PP shall conduct third party audit of compliance of EC condition at an interval six months and its report shall be submitted to IRO, MoEF&CC.	Work of third party audit of EC condition has been awarded to NEERI. Report shall be submitted after scheduled visit in July 2025.
20	The status of mine closure activities must be included in every six months compliance report submitted to the state pollution control board and IRO.	Agreed and will be complied.
21	PP to maintain the topped haul road properly to minimized the dust emission. PP to also develop pucca roads by seeking consent from the panchayat with widening of roads especially roads inter linking the villages within the study area of 10 km radius buffer zone.	Agreed and will be complied based on requirement given by villages. Topped road are maintained annually with repairing works.
22	PP to install solar lights along the road used for transportation of minerals to avoid the accidents at night and also seek its maintenance. PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone within one year.	High mast solar light towers have been installed in Gouri and mathra village.
23	PP to provide bio toilets to the villages located within the study areas within 1 year from the grant of this EC.	2no. Biotoilet each have been provided in Mathra, Dhuptala and Gauri village.

24	PP shall conduct feasibility studies for assessment of voids for backfilling of ash and mixing of ash with overburden, taking up backfilling as hand OB mixing activities during operations as well as post closure of mines in line with the Fly Ash Utilization Notification, 2021	Noted.
25	PP shall pay to farmers of agricultural land if there is any loss due to pollution found by concerned District Commissioner as per extent rules or norms	Agreed.
26	PP shall deploy at least 20% of overall fleet of dumpers/trucks/other vehicles as electrical or CNG/LNG based for transportation of coal/OB etc.	3 nos of LNG dumpers of 30T capacity have been deployed at Sasti Expansion OC mine for Coal transportation.
	STATUATORY COMPLAINT	
1	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.	There is no diversion of Forest land in Sasti Expansion OC mine.
2	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable	Not applicable.
3	The project proponent shall prepare a Site-Specific Conservation Plan / Wildlife Management Plan and approved by the Chief Wildlife Warden. The recommendations of the approved Site-Specific Conservation Plan/Wildlife Management Plan shall be implemented in consultation with the State Forest Department. The implementation report shall be furnished along with the six-monthly compliance report (in case of the presence of schedule-I species in the study area).	Wildlife Conservation Plan for schedule I species have been submitted to DCF office for approval along with fund allocation.
4	The project proponent shall obtain Consent to Establish/Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/Committee.	CTO has been obtained for capacity 2.50 MTPA valid upto 31.03.2025. Further application for validity upto 31.03.2028 has been applied. Copy attached as Annexure IV.
5	The project proponent shall obtain the necessary permission from the Central Ground Water Authority	CGWA NOC has been obtained a valid upto 02.08.2025.
6	Solid/hazardous waste generated in the mines needs to be addressed in accordance to the Solid Waste Management Rules, 2016/Hazardous & Other Waste Management Rules, 2016.	Since the mine is run in HoE manner, there is no washing of HEMM in the premises of mine. However, ETP of 150 MLD has been provided for treatment of Workshop effluent if any.
	AIR QUALITY MONITORING AND PREVENTION	
7	Continuous ambient air quality monitoring stations as prescribed in the statute established in the core zone as well as in the Buffer zone for monitoring of pollutants, namely SO ₂ and NO _x . Location of the stations shall be decided based on PM ₁₀ and PM _{2.5}	CAAQMS has been installed at Sasti OC in consultation with MPCB. Regular monitoring is done fortnightly as below: 1. BSOA-1 – Filter plant at Gouricolony.

	the meteorological data, topographical features and environmentally and ecologically sensitive targets in consultation with the State Pollution Control Board. Online ambient air quality monitoring stations may also be installed in addition to the regular monitoring stations as per the requirement and/or in consultation with the SPCB. Monitoring of heavy metals such as Hg, As, Ni, Cd, Cr, etc to be carried out at least once in six months.	2. BSOA-2-Sastivillage. 3. BSOA-3-SAMOffice. 4. BSOA-4-AreaStore. Ambient Air quality monitoring is being carried out as per GSR 742(E). The monitoring reports on quarterly basis are submitted to MOFF, and MPCB Chandrapur as per directives. Monitoring of heavy metals such as Hg, As, Ni, Cd, Cr, etc is also being carried out at least once in six months by CMPDIL.
8	The Ambient Air Quality monitoring in the core zone shall be carried out to ensure the Coal Industry Standards notified vide GSR 742 (E) dated 25th September, 2000 and as amended from time to time by the Central Pollution Control Board. Data on ambient air quality and heavy metals such as Hg, As, Ni, Cd, Cr and other monitoring data shall be regularly reported to the Ministry/Regional Office and to the CPCB/SPCB.	Ambient Air quality monitoring is being carried out as per GSR 742(E). The monitoring reports on quarterly basis are submitted to MOFF, and MPCB Chandrapur as per directives. Data on ambient air quality and heavy metals such as Hg, As, Ni, Cd, Cr and other monitoring data is regularly reported to the Ministry/Regional Office and to the CPCB/SPCB.
9	Transportation of coal, to the extent permitted by road, shall be carried out by covered trucks/conveyors. Effective control measures such as regular water/mist sprinkling/rain gun shall be carried out in critical areas prone to air pollution (with higher Values of PM^{102.5} such as haul road, loading/unloading and transfer points. Fugitive dust emissions from all sources shall be controlled regularly. It shall be ensured that the Ambient Air Quality parameters conform to the norms prescribed by the Central/State Pollution Control Board.	Transportation of coal, to the extent permitted by road, is carried out by tarpaulin covered trucks. Adequate Fixed type water sprinklers are provided in & around C.H.P. Weigh Bridges, coal transport roads, transfer points etc. as per direction of M.P.C.B., Chandrapur. They are being properly maintained & operated. Details of Air pollution Control measures are given as below :- Fixed sprinklers are provided at 100 MT weighbridge- 08 Nos. 1. Fixed sprinklers are provided at Main CHP - 06 Nos. 2. Along Coal transportation road - 04 nos 3. Concrete pavement provided at coal unloading Area and loading point at mini CHP. 4. Brooming and maintenance of coal transport road and weigh bridge road is done regularly. 5. Spraying of water by 5 Nos. of Mobile Water Tankers (Hired-1 nos. Of 4 KL, Departmental - 2 nos. of 28 KL each and HOE contractor - 2 nos. Of 28 KL each) 6. Concrete pavement is provided in w/s complex. 7. Coal carrying Trucks are covered with Tarpaulin. 8. Tarring of 06.00 km length of internal roads used by Coal Transportation trucks. 9. One no. of trolley mounted fogger has been commissioned at Sasti OC mine

		with a throw of 100m. 10. Further 3 nos. are to commissioned in July 2025. Tyre wash system has been installed.
10	The transportation of coal shall be carried out as per the provisions and route envisaged in the approved Mining Plan or environment monitoring plan. Transportation of the coal through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed so that the impact of sound, dust and accidents could be appropriately mitigated.	The transportation of coal is carried out as per the provisions and route envisaged in the approved Mining Plan/environment monitoring plan.
11	Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining 'PUC' certificate from the authorized pollution testing centres.	Vehicular emissions is being kept under control and regularly monitored. All the vehicles engaged in mining and allied activities operate only after obtaining 'PUC' certificate from the authorized pollution testing centres.
12	Coal stock pile/crusher/feeder and breaker material transfer points shall invariably be provided with dust suppression system. Belt-conveyors shall be fully covered to avoid air borne dust. Side cladding all along the conveyor gantry should be made to avoid air borne dust. Drills shall be wet operated or fitted with dust extractors.	Drills are being wet operated. Details of Air pollution Control measures are given as below :- Fixed sprinklers are provided at 100 MT weighbridge- 08 Nos. 1. Fixed sprinklers are provided at Main CHP - 06 Nos. 2. Along Coal transportation road - 04 nos 3. Concrete pavement provided at coal unloading Area and loading point at mini CHP. 4. Brooming and maintenance of coal transport road and weigh bridge road is done regularly. 5. Spraying of water by 5 Nos. of Mobile Water Tankers (Hired-1 nos. Of 4 KL, Departmental – 2nos. of 28 KL each and HOE contractor – 2 nos. Of 28 KL each) 6. Concrete pavement is provided in w/s complex. 7. Coal carrying Trucks are covered with Tarpaulin. 8. Tarring of 06.00 km length of internal roads used by Coal Transportation trucks. 9. One no. of trolley mounted fogger has been commissioned at Sasti OC mine with a throw of 100m. 10. Further 3 nos. are to commissioned in July 2025. Tyre wash system has been installed.

13	Coal handling plant shall be operated with effective control measures w.r.t. various environmental parameters. Environmental friendly sustainable technology should be implemented for mitigating such parameters.	Agreed and will be complied.
WATERQUALITYMONITORINGANDPREVENTION		
1	The effluent discharge (mine waste water, workshop effluent) shall be monitored in terms of the parameters notified under the WaterAct,1974 Coal Industry Standards vide GSR742(E) dated 25 th September, 2000 and as amended from time to time by the Central Pollution Control Board.	The effluent discharge (mine waste water, workshop effluent) is being monitored on fortnightly basis by CMPDIL in terms of the parameters notified under the Water Act, 1974 Coal Industry Standards vide GSR 742 (E) dated 25 th September, 2000 and as amended from time to time by the Central Pollution Control Board
2	The monitoring data shall be uploaded on the company's website and displayed at the project site at a suitable location.The circular No.J-20012/1/2006-IA.11 (M) dated 27 th May, 2009 issued by Ministry of Environment, Forest and Climate Change shall also be referred in this regard for its compliance.	The monitoring data is being uploaded on the company's website. Also, Same is being reported to MPCB/CPCB/MoEF&CC on six monthly basis.
3	Regular monitoring of ground water level and quality shall be carried out in and around the mine lease area by establishing a network of existing wells and constructing new piezometers during the mining operations. The monitoring of ground water levels shall be carried out four times a year i.e. pre-monsoon, monsoon, post-monsoon and winter. The ground water quality shall be monitored once a year, and the data thus collected shall be sent regularly to MOEFCC/RO.	Regular monitoring of groundwater level and quality is being carried out in and around the mine lease area by establishing a network of existing wells and constructing new piezometers during the mining operations. The monitoring of ground water levels is carried out four times a year i.e. pre-monsoon, monsoon, post-monsoon and winter. The ground water quality is monitored once a year, and the data thus collected is sent regularly to MOEFCC/RO on half yearly basis.
4	Monitoring of water quality upstream and downstream of water bodies shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.	Agreed and will be complied.
5	Ground water, excluding mine water, shall not be used for mining operations. Rainwater harvesting shall be implemented for conservation and augmentation of ground water resources.	Ground water, excluding mine water, is not be used for mining operations. Rainwater harvesting have been implemented for conservation and augmentation of ground water resources at various office buildings in Ballarpur Area.

6	Catch and/or garland drains and siltation ponds in adequate numbers and appropriate size shall be constructed around the mine working, coal heaps & OB dumps to prevent run off of water and flow of sediments directly into the river and water bodies. Further, dump material shall be properly consolidated/ compacted and accumulation of water over dumps shall be avoided by providing adequate channels for flow of silt into the drains	Settling / sedimentation pond of appropriate size has been constructed to treat the industrial(Mine activity area) effluent including water pumped out from mine considering peak discharge. The water so treated is being used within the mine premises for dust suppression, watering of PLANTATION, Industrial use, fire fighting.. Garland drains of appropriate different sizes of 3.00x2.00, 2.00x1.5, & 1.5.x1.00mtr. for a total length of 12235.00mtr.have been provided along the periphery of excavated area as well as OBD. Desilting is being done every year before onset of monsoon. Further construction of Garland drains will be taken up as per requirement of mine with due regards to safety.
7	The drains/ ponds so constructed shall be regularly de-silted particularly before onset of monsoon and maintained properly. Sump capacity should provide adequate retention period to allow proper settling of silt material. The water so collected in the sump shall be utilised for dust suppression and green belt development and other industrial use. Dimension of the retaining wall constructed, if any, at the toe of the OB dumps within the mine to check run-off and siltation should be based on the rainfall data.Theplantationof native species to be made between toe of the dump and adjacent field/habitation/water bodies.	OB Dumps which are adjacent to coal transport roads. The Dump are also thickly planted on top as well as on slope. The afforestation have become so dense and self sustaining that the side slope is not at all visible. The plants have attained the height of approx, 9 to 10 mtrs. In the present operating portion of mine specially benches, such retaining wall is not required. More over cross drainage in OB benches have been provided which carry all the silts & sediments ultimately to mine sump provided at the floor of seam. The sump capacity is sufficient enough to allow settlement of suspended matter significantly and only supernatant water is pumped out on surface. Desilting of drains is being done before onset of monsoon every year.
8	Adequate groundwater recharge measures shall be taken up for augmentation of ground water. The project authorities shall meet water requirement of nearby village(s) after due treatment conforming to the specific requirement (standards).	Rainwater harvesting have been implemented for conservation and augmentation of ground water resources at various office buildings in Ballarpur Area. Water is being supplied to nearby villages through tankers during dry season to cater to their water requirement.
9	Industrial waste water generated from CHP, workshop and other waste water, shall be properly collected and treated so as to conform to the standards prescribed under the standards prescribed under Water Act 1974 and Environment (Protection) Act, 1986 and the Rules made there under, and as amended from time to time. Adequate ETP /STP needs to be provided.	Since the mine is run in HoE manner, there is no washing of HEMM in the premises of mine. However, ETP of 150 MLD has been provided for treatment of Workshop effluent if any.

10	The water pumped out from the mine, after siltation, shall be utilized for industrial purpose viz. watering the mine area, roads, green belt development etc. The drains shall be regularly desilted particularly after monsoon and maintained properly.	Mine discharge after treatment through sedimentation tank is being utilized for dust suppression and fire fighting purposes. Desilting of drains is being done before onset of monsoon every year.
11	The surface drainage plan including surface water conservation plan for the area of influence affected by the said mining operations, considering the presence of river/rivulet/pond/lake etc, shall be prepared and implemented by the project proponent. The surface drainage plan and/or any diversion of natural water courses shall be as per the approved Mining Plan/EIA/EMP report and with due approval of the concerned State/GoI Authority. The construction of embankment to prevent any danger against in rush of surface water into the mine should be as per the approved Mining Plan and as per the permission of DGMS or any other authority as prescribed by the law.	The surface drainage plan and/or any diversion of natural water courses will be as per the approved Mining Plan/EIA/EMP report and with due approval of the concerned State/GoI Authority. The construction of embankment to prevent any danger against in rush of surface water into the mine will be as per the approved Mining Plan and as per the permission of DGMS or any other authority as prescribed by the law.
12	The project proponent shall take all precautionary measures to Ensure riverine/riparian ecosystem in and around the coal mine up to a distance of 5km. A riverine/riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation /water resource department in the state government.	Copy of study undertaken by IIT Kharagpur attached as Annexure VII.

	NOISE AND VIBRATION MONITORING AND PREVENTION	
--	---	--

1	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.	Regular monitoring through CMPDIL is being done on fortnightly basis and the results are within limits, Workers exposed to high noise level are provided with earplugs/muffs. HEMM are properly maintained and kept in good condition. Noise proof cabins of HEMM are also provided. Sound level meter is used for measuring noise levels at work place and records are maintained.
2	Controlled blasting techniques shall be practiced in order to mitigate ground vibrations, fly rocks, noise and air blast etc., as per the guidelines prescribed by the DGMS.	Blasting is done as per Scientific Blasting study in order to mitigate ground vibrations, fly rocks, noise and air blast etc., as per the guidelines prescribed by the DGMS.
3	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.	The noise level survey is being carried out on a fortnightly basis as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard is being submitted to the Ministry/RO on six-monthly basis.

	MINING PLAN	
--	-------------	--

1	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.	Agreed.
---	---	---------

2	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws related to coal mining and the relevant circulars issued by Directorate General Mines Safety (DGMS).	Mining will be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws related to coal mining and the relevant circulars issued by Directorate General Mines Safety (DGMS).
3	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980.	No forest land involved in Sasti Expansion OC mine.
4	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.	Solar power station of 60Kwh and 11Kwh has been setup at Ballarpur Area for energy conservation. Also, use of LED bulbs have been made for reduction in energy usage.
	LAND RECLAMATION	
1	Digital Survey of entire lease hold area/core zone using Satellite Remote Sensing survey shall be carried out at least once in three years for monitoring land use pattern and report in 1:50,000 scale or as notified by Ministry of Environment, Forest and Climate Change (MOEFCC) from time to time shall be submitted to MOEFCC/Regional Office (RO).	Digital Survey of entire lease hold area/core zone using Satellite Remote Sensing survey is being carried out Pattern and report in 1:50,000 scale. t every year for monitoring land use. Copy attached Annexure III.
2	The final mine void depth should preferably be as per the approved Mine Closure Plan, and in case it exceeds 40 m, adequate engineering interventions shall be provided for sustenance of aquatic life therein. The remaining area shall be backfilled and covered with thick and alive top soil. Post-mining land be rendered usable for agricultural/forestry purposes and shall be diverted. Further action will be treated as specified in the guidelines for Preparation of Mine Closure Plan issued by the Ministry of Coal dated 27 th August, 2009 and subsequent amendments.	Agreed and will be complied.
3	The entire excavated area, backfilling, external OB dumping (including top soil) and afforestation plan shall be in conformity with the “during mining”/“post mining” land-use pattern, which is an integral part of the approved Mining Plan and the EIA/EMP submitted to this Ministry. Progressive compliance status vis-a-vis the post mining land use pattern shall be submitted to the MOEFCC/RO.	Agreed and will be complied.
4	Fly ash shall be used for external dump of overburden, backfilling or stowing of mine as per provisions contained in clause (i) and (ii) of subparagraph (8) of fly ash notification issued vide SO 2804 (E) dated 3rd November, 2009 as amended from time to time. Efforts shall be made to utilize gypsum generated from Flue Gas Desulfurization (FGD), if any, along with fly ash for external dump of overburden, backfilling of mines. Compliance report shall be submitted to Regional Office of MoEF&CC, CPCB and SPCB.	Noted

5	Further, it may be ensured that as per the time schedule specified in mine closure plan it should remain live till the point of utilization. The topsoil shall temporarily be stored at earmarked site(s) only and shall not be kept unutilized. The top soil shall be used for land reclamation and plantation purposes. Active OB dumps shall be stabilised with native grass species to prevent erosion and surface runoff. The other overburden dumps shall be vegetated with native flora species. The excavated area shall be backfilled and afforested inline with the approved Mine Closure Plan. Monitoring and management of rehabilitated areas shall continue until the vegetation becomes self-sustaining. Compliance status shall be submitted to the Ministry of Environment, Forest and Climate Change/ Regional Office.	It is being done.Total Plantation of 5.40 lakhs done in Sasti OCM in 179.15 Ha.
